Clean Version Specification

Page 3, lines 12-16

Co-related, an email service provider receives emails for the first and second email addresses of the user, and organizes the received emails by at least the email addresses, and by intended versus non-intended CP/GCP of the email addresses. The email service provider provides these received emails to the computer used by the user, with the emails so characterized accordingly.

Page 6, line 13 – Page 7, line 6

As illustrated, client computer **102** is equipped with browser **132** and enhanced email application **134**, which includes enhanced viewing function **144** and address manager **146**, in addition to conventional functions, such as compose function **142**, and send and receive function **144**. A user of client computer **102** uses browser **132** to visit, commerce or otherwise interact with web sites **112** and **114**. The nature of the interaction is a type that calls for the provision of an email address by the user of client computer **102** for web site **112/114** to send from time to time emails to user. As will be described in more detail below, the user of client computer **102** advantageously uses the enhanced functions provided to email application **134** (address manager **148** in particular) to provide separate and distinct email addresses to web sites **112** and **114**. For the illustrated embodiment, the email addresses are hosted by email service provider **100** (more specifically, address manager **154** of email server **136**). Further email service provider **100** includes enhanced functions (in cooperation with the enhanced functions of email application **134**) in facilitating the user of client computer **102** in quickly discerning whether the received emails are from web sites **112** and **114** or not (i.e. the intended
